## Plan Overview

*A Data Management Plan created using DMPonline*

**Title:** How is the Convention for Biological Diversity attempting to govern digitalisation in the biological sciences for societal benefit?

**Creator:** adam mccarthy

**Principal Investigator:** Philip Shapira, Kieron Flanagan

**Affiliation:** University of Manchester

**Funder:** Economic and Social Research Council (ESRC)

**Template:** ESRC Template Customised By: University of Manchester

**ORCID iD:** 0000-0003-2488-5985

**ORCID iD:** 0000-0002-7299-3158

**ID:** 108647

**Start date:** 13-10-2022

**End date:** 01-06-2024

**Last modified:** 15-03-2024

### Copyright information:

The above plan creator(s) have agreed that others may use as much of the text of this plan as they would like in their own plans, and customise it as necessary. You do not need to credit the creator(s) as the source of the language used, but using any of the plan's text does not imply that the creator(s) endorse, or have any relationship to, your project or proposal

# How is the Convention for Biological Diversity attempting to govern digitalisation in the biological sciences for societal benefit?

---

## Manchester Data Management Outline

**1. Will this project be reviewed by any of the following bodies (please select all that apply)?**

- Ethics

**2. Is The University of Manchester collaborating with other institutions on this project?**

- No – only institution involved

**3. What data will you use in this project (please select all that apply)?**

- Acquire new data
- Re-use existing data (please list below)

New data in the form of interviews

New data in terms of generating insights from documents

**4. Where will the data be stored and backed-up during the project lifetime?**

- P Drive (postgraduate researchers and students only)

Password protected

Semi anonymised

**5. If you will be using Research Data Storage, how much storage will you require?**

- Not applicable

**6. Are you going to be receiving data from, or sharing data with an external third party?**

- No

**7. How long do you intend to keep your data for after the end of your project (in years)?**

- 0-4 years

***Guidance for questions 8 to 13***

Highly restricted information defined in the [Information security classification, ownership and secure information handling SOP](#) is information that requires enhanced security as unauthorised disclosure could cause significant harm to individuals or to the University and its ambitions in respect of its purpose, vision and values. This could be: information that is subject to export controls; valuable intellectual property; security sensitive material or research in key industrial fields at particular risk of being targeted by foreign states. See more [examples of highly restricted information](#).

If you are using 'Very Sensitive' information as defined by the [Information Security Classification, Ownerships and Secure Information Handling SOP](#), please consult the [Information Governance Office](#) for guidance.

Personal information, also known as personal data, relates to identifiable living individuals. Personal data is classed as special category personal data if it includes any of the following types of information about an identifiable living individual: racial or ethnic origin; political opinions; religious or similar philosophical beliefs; trade union membership; genetic data; biometric data; health data; sexual life; sexual orientation.

Please note that in line with [data protection law](#) (the UK General Data Protection Regulation and Data Protection Act 2018), personal information should only be stored in an identifiable form for as long as is necessary for the project; it should be pseudonymised (partially de-identified) and/or anonymised (completely de-identified) as soon as practically possible. You must obtain the appropriate [ethical approval](#) in order to use identifiable personal data.

**8. What type of information will you be processing (please select all that apply)?**

- Anonymised personal data
- Pseudonymised personal data
- Audio and/or video recordings

**9. How do you plan to store, protect and ensure confidentiality of any highly restricted data or personal data (please select all that apply)?**

- Store data on University of Manchester approved and securely backed up servers or computers
- Store data on servers, computers or devices not connected to an external network
- Pseudonymise data and apply secure key management procedures
- Anonymise data

- Impose suitable data sharing and collaboration agreements
- Access data hosted by the University of Manchester via its secure Virtual Private Network (VPN)

**10. If you are storing personal information (including contact details) will you need to keep it beyond the end of the project?**

- Not applicable

**11. Will the participants' information (personal and/or sensitive) be shared with or accessed by anyone outside of the University of Manchester?**

- No
- Not applicable

**12. If you will be sharing personal information outside of the University of Manchester will the individual or organisation you are sharing with be outside the EEA?**

- Not applicable

**13. Are you planning to use the personal information for future purposes such as research?**

- No

**14. Will this project use innovative technologies to collect or process data?**

- No

**15. Who will act as the data custodian for this study, and so be responsible for the information involved?**

Philip Shapira

**16. Please provide the date on which this plan was last reviewed (dd/mm/yyyy).**

2022-10-12

## **Assessment of existing data**

**Provide an explanation of the existing data sources that will be used by the research project, with references**

Question not answered.

**Provide an analysis of the gaps identified between the currently available and required data for the research**

Question not answered.

## **Information on new data**

**Provide information on the data that will be produced or accessed by the research project**

Question not answered.

## **Quality assurance of data**

**Describe the procedures for quality assurance that will be carried out on the data collected at the time of data collection, data entry, digitisation and data checking.**

Question not answered.

## **Backup and security of data**

**Describe the data security and backup procedures you will adopt to ensure the data and metadata are securely stored during the lifetime of the project.**

Question not answered.

## **Management and curation of data**

**Outline your plans for preparing, organising and documenting data.**

Question not answered.

## **Difficulties in data sharing and measures to overcome these**

**Identify any potential obstacles to sharing your data, explain which and the possible measures you can apply to overcome these.**

Question not answered.

## **Consent, anonymisation and strategies to enable further re-use of data**

**Make explicit mention of the planned procedures to handle consent for data sharing for data obtained from human participants, and/or how to anonymise data, to make sure that data can be made available and accessible for future scientific research.**

Question not answered.

## **Copyright and intellectual property ownership**

**State who will own the copyright and IPR of any new data that you will generate.**

Question not answered.

## **Responsibilities**

**Outline responsibilities for data management within research teams at all partner institutions**

Question not answered.

**Preparation of data for sharing and archiving**

**Are the plans for preparing and documenting data for sharing and archiving with the UK Data Service appropriate?**

Question not answered.

**Is there evidence that data will be well documented during research to provide highquality contextual information and/or structured metadata for secondary users?**

Question not answered.
